Subject: Re: Request for Bat Review: 1 site

Hi Lauren,

Thanks for the information and photos. I don't think the subject property provides suitable habitat for any federally listed species. Thus, the proposed project will have no effect on any federally listed species under U.S. Fish and Wildlife Service jurisdiction.

Jeremy

Hello,

I am submitting the CDBG CEST site located at 544 Broughton Avenue, Bloomfield Township, NJ 07003 (Pams Pin 0702_991_81) to you for review. As indicated on the Endangered Species Maps I have attached, the site falls inside of the Bat GIS layer near the rear of the property. The proposed project does not require DEP land use permits. The project intent for the site includes rehabilitation of a structure on a previously developed parcel. The project will likely occur during the summer months, however, we cannot be certain of this timeframe. If there is a certain period which should be avoided, please provide that information and the project can be "conditionally cleared" to meet these restrictions.

I have included the site maps, endangered species map, a site photo and GIS shapefiles, as you requested. Please let me know if you need any more information in order to complete your review.
